MELLOX AI · WEBSITE UPDATE

New features to add to the website

For: Umar (CTO) · From: Zain · 11 November 2026
Everything we shipped from 21 October to 11 November 2026.

Umar, these are the new features from the last few weeks that need to go on the website. Please add a section for each one with a short description and fresh screenshots from the app. I'll send you the Mox 3D character files separately.

New features: Mellox 2.0 with Mox, new UI and UX, Campaigns, Inspo, the Reddit agent, new video types, creator UGC ads, product hero posters, Library taste, social analytics and new connectors.

1. Mellox 2.0 and Mox, our 3D character New

- Meet **Mox**, the 3D character who guides you through Mellox: greetings, chat, onboarding, the tour and loading screens.
- Use Mox as the main visual on the homepage and features page.

2. New UI and UX New

- The whole app is redesigned: clean light theme, a soft Mox gradient, and a simpler sidebar.
- New **Home** with quick cards: Swipe ideas, Blog ideas, Animate and Autopilot.
- New **Create** screen to pick how you want to make content.
- Simpler **Studio** with one clean page from prompt to Generate.
- **Streaks and levels** that grow with every piece you make.
- New onboarding: scan your website, set your goal, choose your language, add your products, then press and hold to enter.
- Smoother animations throughout.
- Mox writes your content in your brand's language.

3. Campaigns New

- Plan a full campaign around a key date. Mellox builds the phases, posts and Stories for you.
- 16 campaign types: Product launch, Event or webinar, Seasonal, Sale or offer, Brand showcase, Teach a series, Memes and fun, Behind the scenes, Customer stories, Giveaway or contest, Free guide or sign-ups, Collab or partnership, Milestone, Grand opening, Hiring, Cause or awareness day.
- Mellox writes the plan using your brand's results and current trends.
- Posts are made automatically and wait for your approval. You get an email when something needs you.

4. Inspo New

- One place to set your brand's look: Board, Post look, Video look, Voice and Media.
- Upload what you love and what to avoid, plus product photos and your team.
- "Learn my style" studies your references and website so every post looks like your brand.
- Upload up to 100 files at once.

5. Reddit agent New · Beta

- Finds Reddit conversations where your brand can help and drafts replies for you to approve.
- Community threads show up in your weekly report.
- Wording for the site: "finds conversations and drafts replies you approve". Don't say it posts automatically yet. We're still waiting for Reddit's approval.

6. New video types New

- 12 video styles: Bring a post to life, Animate the product, Motion post, Product showcase, Short story, How it works, Before and after, Mood, Product demo, Beautiful shots one line, Offer, Motion graphics.
- Every video is planned as a storyboard and quality checked before you get it.
- Automatic soundtrack: a voiceover plus background music.
- Motion graphics videos made from your logo, photos and words.
- Edit your own clips with smart cuts and automatic captions.

7. Creator UGC video ads New

- Make creator-style video ads from one screen: choose a creator, product, script, emotion, place and length.
- 30 Reel formats: interviews, skits, talking to camera, reviews and lifestyle.
- Instagram-style hook text on the video.
- Create your own creator, or use your own team as the face of your brand.

8. Product hero posters and photo design New

- Your real product photo is placed in a fresh, eye-catching scene every time, in your brand's colours.
- Designs built around your own photos without redrawing them.
- Carousels with connected slides that flow into each other.

9. Library and taste New

- A new Library that shows every piece at its true shape.
- Heart what you love and Mellox learns your team's taste for future content.

10. Social analytics New

- See how all your social posts perform, including ones not made in Mellox.
- New Ads and leads view from Google Ads and HubSpot.
- Analytics now works without connecting Google.

11. New connectors New

Show these as a logo grid on the integrations page, using the real app logos.

App	What Mellox does with it
Instagram, Facebook, LinkedIn, YouTube, Pinterest	Publish posts and read their results
Canva	Edit Mellox designs in Canva
Google Drive	Save your content to a Mellox folder
Gmail	Save email drafts
Google Ads	Turn a Studio ad into a Search campaign, ready for you to launch
HubSpot	Track new leads against your goal
Mailchimp	Turn a post into a draft email campaign
Google Sheets	Export your content calendar
Wix	Connect your website
Reddit	Coming soon (waiting for approval)
Shopify, Klaviyo, TikTok Ads	Coming soon

Already live and should stay on the page: X, Threads, TikTok, GitHub, WordPress, Webflow, Google Analytics, Search Console, Notion and Slack.

Next steps

- I'll share the Mox 3D character with you.
- Take fresh screenshots from the new app in light mode.
- Send me a staging link before it goes live so I can check it.
